Ask your healthcare provider if Epi proColon® is right for you.

## Why get screened for colorectal cancer?

- It can happen to anyone.
- When found early, cure is more likely.
- Having cancer doesn't just affect you.

## Is Epi proColon right for you?

The answer is yes if you are:

- Age 50 or older
- Considered average-risk for getting colorectal cancer
- Patients who are non-compliant with other recommended methods (colonoscopy, stool tests, & others)

## If yes, what's next?

- Talk with your doctor about whether Epi proColon is right for you.
- If yes, **get the blood test.**
- Then, discuss your test result with your doctor.
  - If Epi proColon is positive, your doctor will recommend a colonoscopy.
  - If Epi proColon is negative, you should discuss your future screening plan with your doctor.
